

Queen of Pentacles

Traditional meaning:

Someone special is nurturing you or you are nurturing someone special. At the core of the situation is an important thing of value – either material wealth or emotional security.

My Interpretation:

The queen is well off. She has an elegant had with a silver wing top and a fur cloak. Her world is peaceful and serene. There are blue skies with fluffy white clouds. The large pentacle is her focus, safely in her lap. She gazes at it with calm affection. It is right there, it is large, it is safely hers. The goals she wants are there and well cared for.
