

Two of Pentacles

Traditional meaning:

This card is about balancing finance needs with spiritual, community, family, and other needs. It's about finding that equilibrium between the two. It's about maintaining that balance even as life's normal ups and downs arrive.

My Interpretation:

The figure could be a man or a woman. It's "any person" They have a big, showy hat on, so they enjoy creative expression. They have an interesting tunic on as well. They are juggling / playing with two pentacles / coins and paying attention to them.

Behind them a wave is coming up, and they seem not to really be aware of it. They are focusing on keeping the money going. Should they be more aware of the danger? The skies are blue and fine. Maybe the wave is just more energy to help them out.
