

Queen of Swords

Traditional meaning:

The queen is wise and has a good grasp of the situation. She brings a wealth of experience to the issue and is able to judge it clearly. Honesty and clarity are two of her main strengths. She is also always interested in learning more.

My Interpretation:

This is “my card”. I enjoy it immensely. A woman with long, flowing hair is in plate armor and is ready for battle. She holds a lovely, elegant sword before her. It has roses on it – she appreciates beauty, but she is fully prepared to defend herself and her land. She has a crown which is not pretentious but functional and sturdy. There are waves before her – the sea of conflict she is about to enter.

Many cards have blue skies and fluffy clouds. Not this one. The sky is purple and swirled with storm clouds. That is OK. She is steady and will get through it.
